### **Overnight What to Bring List**

Yurt door lock combination  
Yurt confirmation packet  
Skis or snowshoes, boots, and poles  
Waxes or Maxiglide  
Climbing Skins- highly recommended for the ski into Flat Mtn Yurt  
Backpack- preferably an internal frame  
Sleeping Bag- as warm as you have  
Warm Hat- one that covers your ears  
Mittens and/or Gloves- mittens are warmer  
Wool Socks  
Scarf or neck gaiter  
Long Underwear- both top and bottoms  
Pants- No jeans. Wool, thinsulate, pile, or polypropylene are fine  
Shirt  
Sweater  
Vest  
Jacket- insulated  
Wind and/or Waterproof Shell- both top and bottom  
Gaiters  
Sunglasses  
Sunblock  
Day Pack  
Map and Compass  
Phone- watch, route finding apps, camera all in one  
Phone charger  
First Aid Kit  
Ski Repair Kit  
Avalanche transceiver if looking for steep turns  
Shovel(s)- one big enough to dig in or out your car as well as one for skiing/boarding  
Food  
Water  
Booties or Hut Slippers  
Head lamp or flashlight  
Toilet Paper- this is at the Yurt also  
Toothbrush and Paste  
Soap- biodegradable only

The way to dress for cross-country skiing is to wear layers. This will enable you to stay warm without getting too hot or cold. The above list takes this into account. The list is complete as to required items and includes some personal items also. You are welcome to bring other items as you choose. Remember: Even if the weather is sunny in town or at the trailhead you should still bring plenty of warm clothes.

# What is at the Yurt

This list is intended to serve as a reference for what you can expect to find at the yurt. It does not represent an inventory of items but rather as assistance to guide your preparations.

## **Kitchen:**

The yurt comes equipped with a three-burner propane cook stove. There is a propane tank at the yurt. There is not an oven at the yurt. There are pots and pans, plates, bowls, silverware, utensils, measuring cups and spoons, water glasses, coffee cups, wine glasses, melitta coffee filters and cone, thermos, hot pads, kitchen towels, paper towels, garbage bags, dish soap, scrubbies, spices, salt and pepper.

## **Lighting:**

The yurt comes with two propane lanterns that operate with disposable propane canisters, which are provided. A spare lantern, globe, and mantles are provided as well.

## **Sleeping:**

The yurt is set up to accommodate up to 6 persons. The arrangement is two bunk beds with two mattresses on each with two extra mattresses, which can be put on the floor when needed. There are 6 pillows/cases provided.

## **Warmth:**

The yurt comes equipped with an airtight woodstove, with a glass window for ambiance. Firewood is provided. There is newspaper and matches provided as well for fire starting. Sleeping bags and blankets are not provided.

## **Toilet:**

There is an outhouse for going to the bathroom. The toilet seat resides in the yurt so as to keep it warm for when needed. Toilet paper is provided. There is lime in the outhouse for spreading when finished.

## **Water:**

Water is by snowmelt. There are 2 large pots, which live on the woodstove for melting snow for cooking, drinking, and doing dishes. There are other large pots for collecting snow. It is recommended that all drinking water be boiled or filtered. It is easy to cool down by putting covered pots outside.

## **Games:**

There are some games provided at the yurt. It is attempted to have cards, cribbage, Jenga, Yahtzee, chess, checkers, and backgammon. Every season is rough on the game boxes but the contents should be there.

## **Table:**

There is a table and benches for eating and hanging around. The benches are not padded.

## **Accessories:**

There is a broom, mop and bucket, hatchet, axe, maul, snow shovel, and digging shovel. These will help with managing the snow around the yurt and keeping the yurt tidy inside.

The Southwest Nordic Center welcomes you to our yurt system. Great effort has gone into making our yurts warm and comfortable for your stay. Below are a number of items that will require your attention. Please follow the recommendations for handling of wastes so as to keep the environment safe for groups that will follow (it's worth the extra effort). Please be careful with fire at the yurts and enjoy your stay.

## **Yurt Maintenance-**

**Arriving-** Check-in time is 1:30 PM. Please use the shovel and/or broom to clear any snow off the deck and stairs. Take care not to dig into the deck when chipping ice. You will want to clear a path to the outhouse, and then clear any snow from its roof. A decent path to the outhouse will make using it easier. You will also want to clear as much snow as possible from the roof of the yurt, especially over the door so as to assure its free movement. Please be careful not to tear the roof in the process. **Please do not break the snow shovel.** We all know that you are stronger than it is.

**Water-** supply is by snowmelt, so **No Dogs** at the yurt. Snow may be collected anywhere in the vicinity of the yurt. Care should be taken to select only clean, pure snow. The snow may be melted in the large pot on the wood stove. Take care not to burn the snow when melting or there will be an off taste to the water. It is recommended to boil water to purify it. Filtering will purify and make it taste better.

**Warmth-** an airtight wood stove has been installed for your comfort. Remove excess ashes from the stove before starting a fire. A metal container is kept behind the stove for this purpose. Empty the ashes into the outhouse hole. Paper is provided and kindling may be chopped on a stump on the deck. When stoking the fire, first rake the coals to the front of the stove before adding more wood. Do not leave the stove door open during burning and whenever you leave the yurt be sure that the stove is turned down completely. The damper is opened by pulling the gold knob out from the wood stove. Split wood to be burned is stacked inside next to the wood stove and on the wood deck at the south end of the yurt deck. There is a cover on the wood to keep it drier. If you have trouble getting a fire started then utilize smaller pieces in the stove until a blaze is created.

**Cooking-** the gas cook stove uses propane. To use the gas cook stove, you must first turn on the valve on the propane tank on the deck. Please do not overturn this valve! Second, turn the valve next to the outside regulator in-line with the hose. Next turn on the valve in-line located where the hose attaches to the stove's regulator inside the yurt. Please close the inside valve whenever the cook stove is not in use for extended periods i.e. overnight and during the day. Turn off both valves when you finish your visit. Do not use all three burners for extended periods. This will cause the propane tank to lose pressure and quit working. If you encounter an unsolvable problem with the cook stove there is a back-up two burner stove in the Yurt Maintenance box underneath the bunk opposite the kitchen. This stove uses the same propane cans as the lanterns. Put a hot pad under hot pots and pans when setting them on wood surfaces.

**Lighting-** there are two propane lanterns provided. They use disposable canisters. Extras of these can be found under the bunk adjacent to the kitchen. Always light the match before turning on the gas when lighting the lanterns. The lantern handles get hot when the lanterns are hanging and burning, so use a hot pad when moving them. Be careful not to knock over the lanterns! A spare lantern is available in the Yurt Maintenance box under the bunk opposite the kitchen counter. A spare globe and mantles may be found in a plastic container to the left of the kitchen counter.

## **Yurt Maintenance, page 2**

**Dishes-** there are two 5-gallon stainless steel pots for melting snow to wash dishes. Heat this water on the wood stove when heating the Yurt. Cleaning is with a 3-bucket system utilizing the 3 bus tubs that are provided. Tub #1 gets soap, but very little as the cold dish soap will foam much more than expected! Tub #2 is for the first rinse. Tub #3 is for the final rinse and sanitizing as it gets a touch of bleach (1 tbl/gallon H<sub>2</sub>O). Discard of the dishwater into the outhouse hole.

**Urination-** please do not pee off of the deck, or in random areas around the yurt! Either use the outhouse or on the far side of the outhouse beyond the path.

**Garbage-** garbage bags and a trash can are provided, but each group is expected to carry out their own garbage. Be sure to check the trash can before you go! Leaving a clean bag in the can is appreciated.

**Food-** plastic containers for storing food during your stay are provided, adjacent to the kitchen counter, so as to discourage rodents. Items that need to be kept cold can be stored in a separate container and stored on the floor away from the woodstove or outside (beware of freezing). These plastic containers may have spare food and yurt supplies already, but there should be plenty of room for your food. Feel free to leave left over food for later groups, however do not leave perishables as these simply rot.

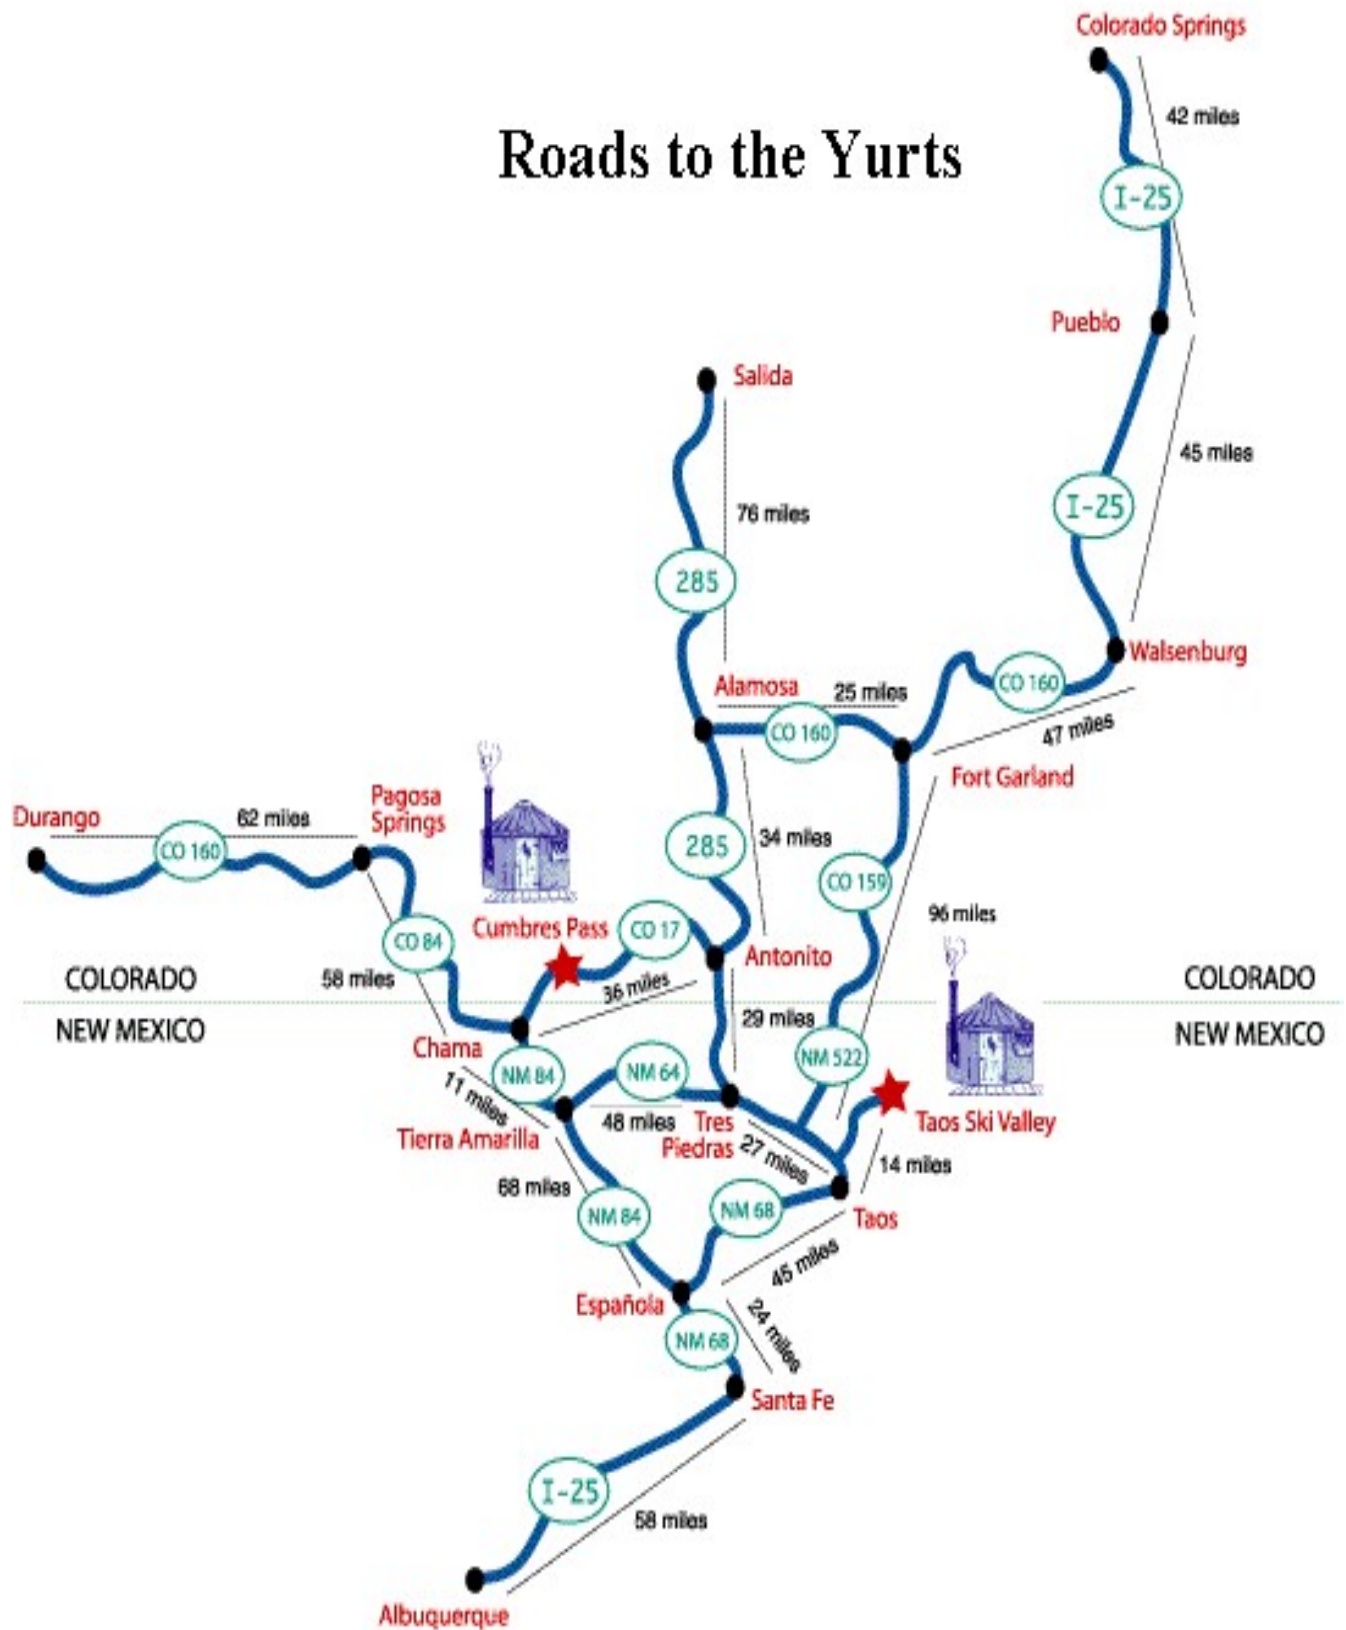

**Yurt Safety-** at each yurt follow the instructions printed on each appliance for safe operation. Operation manuals for the wood stove, gas cook stove, and lanterns may be found in a plastic container to the left of the kitchen counter. Please do not set candles directly on wood surfaces. Instead put them in a container to catch dripping wax and prevent toppling. There is a fire extinguisher attached to the end of the bunk adjacent to the kitchen counter. A first aid kit and maps may be found to the left of the kitchen counter in one of the plastic containers.

**Leaving-** check out time is 1 PM. You may stay later if the next group has not arrived yet, but the yurt should be ready for their arrival. Please leave the yurt as you found it: fresh piles of dry wood and kindling inside with the floor swept, dishes clean and put away.

## **Safety-**

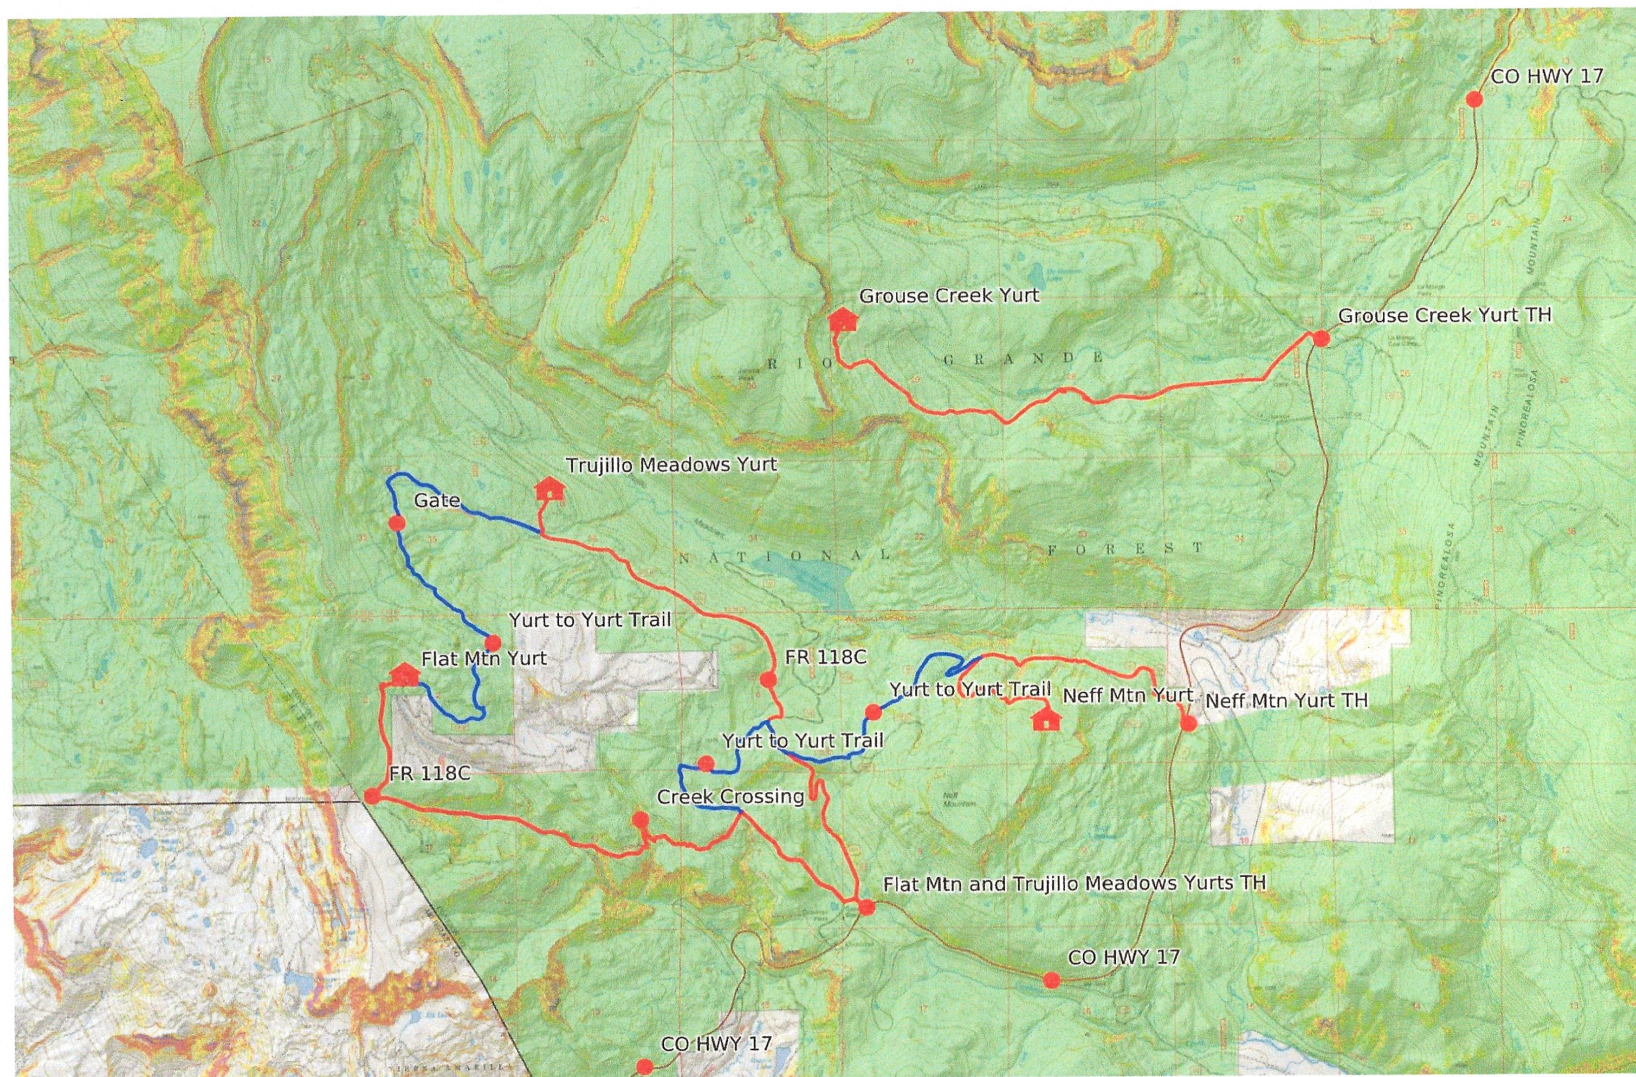

The yurts are in the mountain backcountry. Travel in such a remote area can be hazardous. If you are using the yurts on an unguided basis you are responsible for your own safety. Every group should be prepared for any emergency that may arise. Ski repair and first aid kits should be carried (lists available upon request). Skill with map and compass is required. Phone apps which show your location and the route are recommended. Get an early enough start to adapt to potentially variable conditions. Those wishing to ski steeper terrain should be aware of avalanche dangers. If you are in doubt about a slope's stability then don't ski it! In the event of an emergency call SNC at (575) 758-4761, and for a rescue call the Conejos County Sheriff at (719) 376-5921.

## **Flat Mountain Yurt-**

**Trailhead:** On Colorado 17,.2 miles north of Cumbres Pass or 7.2 miles south of La Manga Pass, at the junction with FR 118, the Trujillo Meadows Reservoir Road.

**Parking:** Excellent parking on the west side of Colorado 17 at the pull out for FR 118, or on the east side just south of this pull out. Be sure to park at least 10' from the highway (may be towed otherwise)! If the lot is not plowed you will have to shovel your way in.

**Trailhead Elevation:** 10,022'

**Trailhead GPS:** 37 01.304N; 106 26.810W

**Yurt Elevation:** 11,100'

**Yurt GPS:** 37.04 336N; 106.49 736W

**Mileage to the Yurt:** 5.2 miles

**Maps:** Cumbres Pass, CO 7.5 min. USGS quad; Archuleta Creek, CO 7.5 min. USGS;  
Rio Grande National Forest

**Directions to the Flat Mountain Yurt-** The trailhead is on Co. Highway 17 at Cumbres Pass, 14.2 miles north of Chama, NM. One begins at the pullout for Trujillo Meadows Reservoir, FR 118. Do not follow FR 118! The first mile of the trail is marked with blue diamonds along FR 119. After that it will be blazed with pink surveyor's tape. From the trailhead the trail heads up to the left and out of the meadow on the northside of the first big hill and south of the second hill at the far west of the meadow. After about 1.0 miles after a short slightly downhill stretch you will veer to the left (south) along an open meadow. From here to the Yurt the trail is marked with pink surveyor's tape. After .2 miles you will intersect the Continental Divide trail (CD trail). Follow the markers and/or the trail on your app until almost 2 miles. You will want to pay particular attention at this point as you head towards the "Creek Crossing" on the above map. Be careful to avoid sliding towards the drainage. At 2 miles you will reach the drainage. There is a switchback after the creek crossing and another place to pay particular attention. You will need to side step up a short pitch then continue away from the drainage. At 2.65 miles you will be just above the Wolf Creek drainage. At this point you will leave the CD trail and follow the drainage. It is 1.4 miles from here to FR 118C. The route will gain 700' in vertical through this stretch. You will follow the creek while staying close to the open areas as well. When you enter the open area after the creek divergence you will want to work your way upstream staying above the trees. At the end of this open stretch (3.3 miles) you will enter the trees following the markers closely. They will lead you through a challenging and intricate route up the drainage. The route will lessen in steepness near the top. Once you reach FR 118C you will turn northward. You will follow the road for 1.2 miles gaining just under 200'. When nearing the Yurt, you will enter an open meadow area and turn left (north) before the hill following both blue diamonds and pink ribbons to the Yurt. If you run into yellow markers then you have gone too far and will want to look for the markers that lead to the Yurt.

**Directions from Flat Mtn Yurt to the Highway-** You will basically retrace the way you got to the Yurt. You head south from the Yurt on FR 118C for 1.2 miles. Then turn east and head down the Wolf Creek drainage. You will want to follow the pink surveyor's tape. There will be a couple of places where the trail takes a sharp turn. Look for the markers to stay on track. After approximately  $\frac{3}{4}$  mile the trail will break out into the open and be easier to follow. You continue down stream until you reach the CD trail. The CD trail will lead you out of the drainage heading back towards Cumbres Pass. You will want to look for where the trail leaves the CD trail and cuts over to FR 119. When you hit this road turn right and follow the blue markers back to the trailhead.
